

PORTA-KING GROW ROOMS

Modular Grow Rooms

Pre-engineered, modular components assemble quickly to facilitate a much shorter construction timeline. This means you are growing and harvesting product much faster than would be possible with conventional construction.

Consider these advantages:

- Systems are easy to assemble or we can provide turnkey installation support anywhere in North America
- All components supplied are reusable so it is easy to move, modify or expand your grow rooms without losing any of your initial material investment
- Light reflective wall panels are available in a variety of durable, easy to maintain finishes that reduce lighting requirements for improved energy efficiency and cost savings
- Wall panels include a solid insulating core to create a highly impact resistant wall surface with outstanding R values
- Tall wall designs to 40' and two story structures are also available
- Qualifies as capital equipment so you can accelerate depreciation 5 1/2 times faster than conventional construction

Prefabricated Guard Booths

Provide protection and comfort for security personnel and their equipment while creating a physical deterrent for unauthorized visitors to your facility. These structures ship to your facility completely assembled and ready for immediate occupancy.

Design features can include:

- Choice of all steel or maintenance free anodized aluminum construction
- Factory applied brick, faux stone or custom paint finishes
- Factory installed restroom facilities
- Interior build outs such as shelving, cabinets, custom flooring and more
- Ballistic rated construction from UL 752 Level 1 – NIJ Level IV

Prefabricated Steel Vestibules

Instantly convert unsecured entrances at your facility to controlled access points. The structural steel design includes a welded tube framework to create an aesthetically pleasing, super strong, weather tight enclosure.

Design features can include:

- Fully glazed walls allow natural light to illuminate the inside of the vestibule
- Ballistic rated construction is available
- Interior lighting options include motion sensor activated, and dusk-to-dawn activated
- Exterior lighting can also be included to illuminate the surrounding area at night
- Optional high security locks can be installed for additional security
- Optional factory prepped doors and frames to receive on-site installation of key pads or card readers

Guard Towers

Improve security by providing guards with an unobstructed point of view over outdoor cultivation centers. Our prefabricated towers consist of galvanized steel structural components that are pre-engineered at our factory for ease of installation. As a manufacturer of both towers and guard booths we offer the added benefit of an integrated, single source solution to complete your entire project.

Towers designs include:

- Optional canopy or guard booth integration
- Concrete foundation design
- 3rd party wet stamped engineering calculations and drawings
- Optional installation support
